Blue Stripe®

Oval Hose

Micro-Irrigation

Application:

Toro Micro-Irrigation Blue Stripe® Oval Hose is manufactured in the United States from premium grade polyethylene resins for tough, dependable operation in the most rigorous agricultural micro-irrigation applications. Small diameter models of Oval Hose may be used as lateral lines in permanent crop applications, while large diameter models may be used as submains and mainlines in row crop applications. The unique, flattened shape of Oval Hose reduces storage space and shipping costs, and lends itself to much easier portability than rigid PVC pipelines.

Features and Benefits:

- Blue Stripe® Oval Hose is manufactured from the highest grades of polyethylene resins for reliability and durability
- Larger diameters provide a cost effective alternative to both rigid and flexible PVC pipelines
- Oval Hose offers freight savings of up to 50% due to its unique, flattened configuration
- Available in a wide range of diameters, coil lengths, and wall thicknesses to accommodate most working pressures, terrains and lengths of run
- A minimum of 2% carbon black is present to prevent ultraviolet degradation and maximize long term service
- State of the art quality control standards and processes ensure consistent, high quality production that meets engineering specifications for durability, longevity and compatibility with mating fittings
- The Blue Stripe® of Quality Trademark is backed by Toro, the most trusted name in Micro-Irrigation
- Industry best Warranty –
7 years for the 42 psi rated models and
2 years for the 21 psi rated models
